EDUCATION

M.S. Cybersecurity Engineering — GPA: 4.0

Auburn University

May 2026

Auburn, AL

M.S. Information Systems — GPA: 4.0

Auburn University

May 2025

Auburn, AL

B.S. Computer Science — Cum Laude

Auburn University

May 2023

Auburn, AL

WORK EXPERIENCE

Security Engineer Intern – Application Security

May 2023 – Aug 2023

LPL Financial

San Diego, CA

- Wrote **Python tooling** to integrate SAST/DAST into **CI/CD** across **31 projects** that added build checks, notifications, and summaries that shortened fix cycles by **2 days/issue**.
- Identified and mitigated an **active SQL injection vulnerability** in a third-party HR vendor system, preventing potential data leakage to address improper error handling and reduce the security risk by **23%**.
- Led security assessments of **54 APIs**, identifying and mitigating authentication flaws and injection risks using OWASP Top 10 best practices, reducing security vulnerabilities by **35%** and strengthening security compliance.

Security Researcher Intern

May 2025 – Sep 2025

Center for AI & Cybersecurity Engineering

Auburn, AL

- Conducted vulnerability assessments and root cause analysis, documenting risks and proposing mitigation strategies.
- Developed scripts to automate log analysis and improve visibility into anomalous system behavior.
- Produced structured technical reports summarizing findings, risk impact, and remediation recommendations.

Graduate Teaching Assistant

Aug 2023 – Present

Auburn University

Auburn, AL

- Taught secure coding principles and common vulnerabilities, reinforcing application security best practices.
- Guided students in debugging and code review, improving code quality and security awareness.
- Developed course materials and documentation to standardize learning and improve knowledge transfer.

PROJECTS

C-Subset Compiler from Scratch

2025

Python, x86 Assembly, Systems Programming

- Built a full compiler pipeline (lexer, parser, code generator) translating C into executable x86 assembly.
- Implemented optimization techniques (constant folding, SSA-lite), improving execution efficiency.
- Designed control flow graphs and memory management systems to ensure correctness and performance.

Enterprise OpenStack Cloud Infrastructure

2023

OpenStack, Ansible, Linux

- Deployed a multi-node cloud environment with automated provisioning using Ansible.
- Implemented network segmentation and access controls aligned with security best practices.
- Documented system configurations and procedures to support maintainability and compliance.

ACHIEVEMENTS & INVOLVEMENT

- Certifications:** CompTIA Security+, Network+, AWS Certified Cloud Practitioner.
- CTF Rankings:** RITSEC CTF (Top 5), DOE CyberForce (8th/100+), picoCTF (Top 2%), Dragos CTF (Top 4%).
- IEEE Access (2025):** Published “Navigating IoT Security: Architectures, Emerging Threats, and Adaptive Countermeasures.”
- Outstanding Graduate Student Award:** Ranked among **Top 10** Master’s students at Auburn University (2024–2025)
- Technical Advisor – Ethical Hacking Club:** Led club meetings with hands-on labs using TryHackMe and HackTheBox to spark student interest in cybersecurity.

TECHNICAL SKILLS

- Languages:** Python, Java, C/C++, SQL, Bash, PowerShell
- Certifications:** CompTIA Security+, Network+, AWS Certified Cloud Practitioner.
